

Jhoner Pineda

Frontend Developer

EXPERIENCE

Peacedev

Lead Frontend Developer | August 2022 - June 2023

- Redesigned the company corporate website
- Developed new features, refactored, improved and supported an existing legacy codebase running in productions
- Implemented E2E testing using Cypress as well as unit testing and ensuring type safety with Typescript
- Took a leadership role in mentoring and guiding a small team of three junior developers, fostering their skills professional growth
- Served as primary technical lead on multiple major projects, collaborating across teams and levels when making code architecture decisions
- Communicated with stakeholders about roadmap progress and championed solutions that met requirements with quick turnaround
- Served as the primary connection between design and development
- Developed, using NextJS, a diverse range of landing pages catering to different industries, showcasing adaptability and versatility in design and implementation
- Utilized Airtable to efficiently manage client data and streamline processes, resulting in the successful implementation of marketing and email campaigns to drive client engagement and increase conversion rates.

Lovepop

Frontend Developer | January 2022 - July 2022

- Developed features meant to increase revenue per session such as Send a Surprise, Upsells
- Strengthened site usability and accessibility
- Implemented A/B Feature Testing
- Shipped high quality code with a focus on scalability, performance and accessibility
- Converted our codebase from Javascript to Typescript
- Extensive participation in bug bashes

Indra

Software Engineer | February 2021 - January 2022

- Migrating web modules from AngularJS to ExtJS
- Creation of Restful APIs with Spring Boot
- Launched several responsive features using React, React-Dashboard and Redux
- Managed endpoints in the back-end using Django to retrieve data for the front-end
- Launched several responsive features using React, React-Dashboard and Redux
