

# Jhoner Pineda

Software Engineer

## EXPERIENCE

### WebRun Labs

*Frontend Developer / February 2023 - June 2023*

- Developed, using React, a diverse range of landing pages catering to different industries, showcasing adaptability and versatility in design and implementation
- Took a leadership role in mentoring and guiding a junior developer, fostering their professional growth
- Collaborated closely with designers to ensure pixel-perfects execution of web applications
- Utilized Airtable to efficiently manage client data and streamline processes, resulting in the successful implementation of marketing and email campaigns to drive client engagement and increase conversion rates.

### Peacedev

*Lead Frontend Developer / September 2022 - February 2023*

- Redesigned the company corporate website
- Implemented E2E testing using Cypress
- Mentored new front end junior developers
- Served as primary technical lead on multiple major projects, collaborating across teams and levels when making code architecture decisions
- Communicated with stakeholders about roadmap progress and championed solutions that met requirements with quick turnaround
- Served as the primary connection between design and development

### Lovepop

*Frontend Developer / January 2022 - July 2022*

- Developed features meant to increase revenue per session such as Send a Surprise, Upsells
- Strengthened site usability and accessibility
- Implemented A/B Feature Testing
- Shipped high quality code with a focus on scalability, performance and accessibility
- Converted our codebase from Javascript to Typescript
- Extensive participation in bug bashes

### Indra

*Software Engineer / February 2021 - January 2022*

- Migrating web modules from AngularJS to ExtJS
- Creation of Restful APIs with Spring Boot
- Launched several responsive features using React, React-Dashboard and Redux
- Managed endpoints in the back-end using Django to retrieve data for the front-end
- Launched several responsive features using React, React-Dashboard and Redux
